## 6 Put your content on your website

It's finally here! You've attended training, and you have your login credentials for your site. It's the moment you've been waiting for - time to take all that content, your planned menu structure, your images, and your new knowledge and put it all on your website!

If you have a team of users who will be building out the site, you will want to coordinate your efforts and make sure you know who is responsible for each section and how you want to proceed. If it's just you - well, get to it!

When you're done, your GeorgiaGov Interactive project manager will review your site to make sure it is good to go, and you will coordinate with them on the best time to launch your website.

You've got a lot of work to do, so we won't keep you! Go on now, and get all your hard work out there on the web!
